

PROGRAMME OUTCOMES

PO1: Basic knowledge: An ability to apply knowledge of basic mathematics, science and engineering to solve the engineering problems.

PO2: Discipline knowledge: An ability to apply discipline - specific knowledge to solve core and/or applied engineering problems.

PO3: Experiments and practice: An ability to plan and perform experiments and practices and to use the results to solve engineering problems.

PO4: "Engineering Tools: Apply appropriate technologies and tools with an understanding of the limitations.

PO5: The engineer and society: Demonstrate knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to engineering practice.

PO6: Environment and sustainability: Understand the impact of the engineering solutions in societal and environmental contexts, and demonstrate the knowledge and need for sustainable development.

PO7: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO8: Individual and team work: Function effectively as an individual, and as a member or leader in diverse/multidisciplinary teams.

PO9: Communication: An ability to communicate effectively.

PO10: Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the context of technological changes.

Programme Specific Outcomes (PSOs)

- 1) Ability to develop technical skills for analyzing, troubleshooting and enhancing Hardware, Software and networking based application.
- 2) Ability to apply the domain knowledge and logical reasoning on various attributes of design and development for broadly defined problems with testing tools.
